

DOWNLOADING FILES FROM CAMISGROUP.ORG

An issue currently exists within internet explorer 7.0 & 8.0 that prompts a user to login every time they open a file from SharePoint. This is a well documented issue that Microsoft is aware of, but they haven't addressed it with an easy fix yet.

In the mean time, there are a few workarounds that can be used.

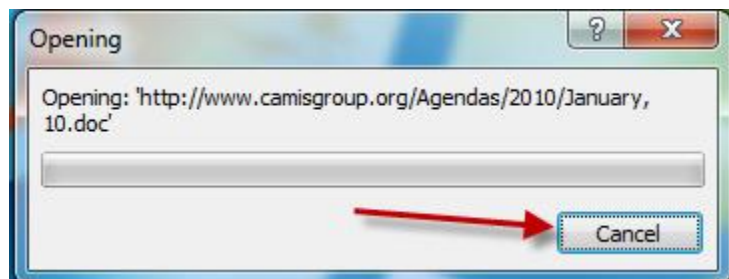

Option 1

When you want to view a file, right click on the link and select "Save Target As..." You will then be prompted to download the file to your local PC.

Option 2

When you attempt to open the file and are presented with a login screen, click the X in the top right of the login box. On the next box that pops up, click **Cancel**

Option 3

Use Firefox (available from www.mozilla.com) to view the website
